## PROJECTS

### Event website

**KEvent** ( [watch project](#) )

**Description :** Learning to use PHP and MySQL by creating an event website to create and register for events. In addition, a user can visit the site anonymously or through an account created on the site.

### Humor of tweets

**Humeuristes** ( [watch project](#) )

**Description :** This project aims to study the general opinion of a certain keyword, given, on twitter. A web interface allows you to launch a search and analyze the results.
